Monkeyflower hybrid

*Mimulus 'White'*

Plant Type: Perennial

Flower Color: White

Flowering Time: May to October

Height: 2 feet

Width: 2 feet

Exposure: Sun-part shade

Water Req.: Occasional - once a month or so, depending on temperatures and wind.

Habitat Value: Hummingbirds, butterflies, bees

Comments and Maintenance:
Small shrubby plant, covered with large, showy flowers all summer long. Flowers attract bees, butterflies, as well as hummingbirds. *Mimulus* should be pinched back in the fall/winter, to encourage new growth and flowers. Plants will not recover from hard pruning. Deer resistant. This variety will tolerate more shade than the others, and still bloom freely.
