Thimbleberry

*Rubus parviflorus*

**Plant Type:** Shrub

**Flower Color:** White

**Flowering Time:** April to August

**Height:** 6 feet

**Width:** 6 feet

**Exposure:** Sun-part shade

**Water Req.:** Moderate - every 3-4 weeks or when top 3-4" of soil is dry.

**Habitat Value:** Birds

**Comments and Maintenance:**
Large red edible berries in the summer are a highlight of this plant. Single, white blossoms are attractive in the early spring. Large leaves provide contrast with other plants. It does require some water, its natural habitat is along streams in the forest.
