October General Meeting – Tuesday, October 21, 7:30 pm
Alistair Bleifuss: Creeks of Santa Rosa
Throughout the Santa Rosa area are creeks on public lands whose native riparian plants and the wildlife habitat they provide could benefit from a helping hand. Folks don’t have to travel to far to find places that they can enjoy and help nurture. Alistair Bleifuss coordinates the Creek Stewardship Program for the City of Santa Rosa and Sonoma County Water Agency.

Note: Debby Zygielbaum’s talk, which was announced for the October General Meeting in last month’s newsletter, has been rescheduled for November.

November General Meeting – Tuesday, November 18, 7:30 pm
Debby Zygielbaum on Native Plants in the Garden: Planting and Maintenance

General meetings are held on the 3rd Tuesday of the month at:
Luther Burbank Art & Garden Center
2050 Yulupa Avenue, Santa Rosa

Don’t Miss the Annual Native Plant Sale on Saturday, October 11!

Chapter Board Meeting
The Milo Baker Board will meet at the Environmental Center, located at 404 Mendocino Avenue in Santa Rosa, Suite A, at 7 pm on Tuesday, November 11, 2003. Anyone interested in the work of the chapter is welcome to attend. Meetings are regularly held every other month, on the 2nd Tuesday.
President's Corner

Due to the ongoing struggle to regain my health & vitality from the grip of Lyme Disease. I’ve made a very difficult decision and resigned as president of the Milo Baker chapter. Serving as Chapter president for the past 3 years has been a huge privilege and a huge challenge. There have been so many changes since I came on board. We lost a lot of our longterm, experienced board members around that same time and many of us newbies had to learn quickly. I’m proud of our many accomplishments, which include our well-attended monthly public lecture series, popular Fall Native Plant Sale, and our new, first annual Spring Wildflower Festival; our many field trips, open to the public; community projects such as the Doyle Park Garden, and our 3 preserves that we manage for the protection of rare native plants. You can expect to see us becoming even more visible as a force for public education, plant material & information resources, & community activism. Thanks to all for your support and good wishes. – Leana Beeman-Sims

Our Annual Plant Sale – October 11, 9am - 1 pm

Help needed

Yes, it’s that time of year again. Time for all members to pull together for our big sale fundraiser! This year Becky Montgomery, Mary Aldrich, and I will be pricing and labeling plants the week before. Anyone who has some free time during the day on Tuesday, Wednesday, or Thursday before the sale, please call Liz at 833-2063. These vital tasks go faster if we have a lot of help. The plant will be collected at the usual collection centers. If you are growing plants for the sale please bring them to any of the following collection centers on the weekend before the sale: in Santa Rosa, Mary Aldrich’s, 4775 Newanga Avenue, Santa Rosa 539-9005. In Fulton, Cal Flora Nursery, D and Sommers, 528-8813. In Sebastopol, Hale’s Apple Farm, 1526 Gravenstein Hwy., North, Dave Hale, 823-4613

We will also need plenty of help Friday evening, when we move the plants into the Vet’s building and on Saturday at the sale. Judy Hartwig, 823-1821 will be organizing the personnel at the sale, so give her a call if you can help. We also need truckers to bring the plants on Friday night. Call me, at 833-2063 if you have a truck.

Highlights of the Sale

A special feature of this year’s sale will be a grasses display from the California Native Grass Association. We thank our member Dave Dietz for coordinating this effort. We will have many native grasses for sale. The interest in using grasses in the landscape is growing and we have expanded our selection of native bunch grasses at every sale.

This year we will have plants grown by our volunteer growers as well as plants donated by Cal Flora, Mostly Natives and Shooting Star Nursery. We had two potting-up workshops for the plants that we will sell and I am very excited about the plants which we will have to offer.

There will be many herbaceous perennials: native iris, both named varieties and species; columbine (Aquilegia formosa), bleeding hearts (Dicentra formosa), seep monkey flower (Mimulus guttatus), yellow-eyed and blue-eyed grass (Sisyrinchium sp.), wild strawberry, yerba buena (Satueja douglasii), stream orchids (Epipactis gigantea), Achillea 'Pink Island Form”, narrow leaved milkweed (Asclepias fascicularis), Penstemon species, and many more. There will be the usual assortment of shrubs: many varieties of Manzanita and Ceanothus, plus California wax myrtle (Myrica Californica), sticky monkey flower (Mimulus aurantiacus.), toyon (Heteromeles arbutifolia). and many more. Check out the seeds and bulbs table for an interesting selection of bulbs. Mariposa lilies (Calochortus superbus, C. venustus), golden brodiaea (Triteleia ixioides) ’Starlight’, chocolate lily (Fritillaria biflora) 'Martha Roderick', and yellow fritillary (F. pudica) ‘Fragrance’ will be for sale, as well and a selection of native seeds collected by members.

The habitat table will feature plants that attract birds and butterflies. Louise Hallberg and Leana Beeman-Sims will answer all your habitat questions and help you select the proper plants.

See you at the Plant Sale
The work of the Milo Baker Chapter depends on the success of our plant sale. Please tell your friends, and come and buy plants. Volunteers will get a chance to purchase plants on Friday night from 6:30-8:30pm.

Fall is planting season in California. Plant the plants that you purchase at the sale as soon as possible. The soil is still warm and the roots will grow slowly through the rainy season. The following year, the plants are ready to survive the summer heat. A plant planted in the spring does not have a well-developed root system and will have difficulty surviving through the summer. – Liz Parsons

*Remember – Fall is planting time in California. See you at the plant sale!* 

---

**Conservation Report**

**Conservation Committee Email List**

The Conservation Committee maintains an email list of chapter members who want to be kept informed of proposed or ongoing conservation-related projects and activities. In the past, there have not been more than a few emails sent out per week from CC members, and some weeks there have been none. Being on the list does not commit you to doing anything specific, but it is a way of keeping yourself “in the loop” on what is happening. To be added to the list, simply send an email to Bob Hass at bhass@vom.com, and in the body of the message type, “Add to CC list.”

**Progress on Invasive Weeds**

Kathleen Kraft has been attending monthly meetings of the Marin-Sonoma Weed Management Area (MSWMA) on behalf of our chapter. Bob Soost of CNPS’ Marin chapter has also been participating. The group has nearly completed revision of its strategic plan, which will help prioritize goals and guide grant writing. There is now a GIS map of distaff and purple star thistle for the MSWMA. These were the weeds of most concern to farmers and public landowners based on a survey taken a few years ago. An intern is currently mapping a number of other invasive weeds. Funding from 2002 made possible a limited amount of on-the-ground eradication work by crews in 2003. New funding is needed to continue this work next year. The group has just developed a “weed card” – a handy reference that indicates the optimal times to use various control methods for about 15 of the two counties’ most troublesome weeds. It also has revised its weed brochure. Both publications will be available early in 2004. For additional information on the MSWMA, visit its new website: [http://www.marinsonomaweedmanagement.org/](http://www.marinsonomaweedmanagement.org/).

Also, on **Saturday, October 18**, the MSWMA is sponsoring a **workday to remove South African iceplant**, a highly invasive coastal weed, at Audubon Canyon Ranch’s Toms Point Preserve—a beautiful, and seldom-visited nature preserve on Tomales Bay. For information, go to the group’s website, or call Daniel Gluesenkamp at 935-8417.

**Invasives Coordinator Sought**

Our chapter currently does not have someone to arrange occasional workdays to remove invasive plants in the county. If you are concerned about the damage that invasive exotics wreak on our native plant habitats and might like to help out, please contact Bob Hass.

**Conservation Co-Chair Now on State Board**

Lynn Houser has stepped down as chapter Conservation Co-Chair to serve as a Director of the 2004-2005 State CNPS Board of Directors. Bob Hass will continue on as chapter Conservation Chair. Lynn was elected as one of four new Directors (which include Diana Hickson and Vern Goehring, both of Sacramento Valley Chapter, and Mary Shaw of the Willis Jepson Chapter, Solano County. Carol Witham was elected President, and former Education program chair Carol Baird was elected Secretary. Vice President Sandy McCoy (East Bay Chapter), Treasurer Steve Hartman (Los Angeles Chapter), and David Magney (Channel Islands Chapter) continue their current terms. Lynn is currently working on a state committee to review and revise CNPS conservation policies. In the coming year she is looking forward to spending some time on membership and chapter support, now that both her kids are in school. However, she continues to keep an eye on chapter conservation issues, and welcomes help in writing letters. She also encourages anyone interested in state issues and positions to get involved, and to check out the state CNPS website (http://www.cnps.org).

**Fate of California Oak Woodlands**

Janet Santos Cobb, president of the California Oak Foundation, addressed the state CNPS conservation conference September 13. She told participants that there is little
hope the state legislature will pass laws to protect oak woodland habitat, which is being destroyed at an alarming rate. Therefore, her organization is contemplating putting an initiative on the California ballot to protect oaks. To get enough signatures so the measure qualifies for the ballot may cost around $1 million.

**Where Conservation and Policy Intersect**

If you visit the state CNPS website, you will notice several new sections at the top of the homepage. One is "An Eye on Bush Administration Policies," which includes information on how federal plans, policies, and legislation affect California and the nation. There are sample letters you can use to protest specific issues. You can also sign on to a letter that points out how the Bush administration is misusing science in its policies and programs, and the environmental damage they are causing. It will be sent this fall to the president, Congress, California legislature, and the media. Also, the current issue of *Mother Jones* magazine contains a section on Bush administration tactics on the environment that is well worth reading. (continued on next page)

**State Conservation Conference**

Two Milo Baker chapter members, **Lynn Houser** and **Bob Hass**, attended the state Conservation Conference held September 12-13 in Monterey. One of the main agenda items involved considering a number of current or proposed state policies, hearing program updates, and prioritizing conservation needs. David Chipping, state conservation director, is establishing a conservation council comprised of chapter conservation chairs, state staff, and other interested individuals. The purpose of the new council is to improve communication within the organization on conservation issues. The state Chapter Council has its own Conservation Policy Issues Committee, which oversees all CNPS conservation policies. The Committee is still looking for a Chair, which can be an individual from any of the chapters. If interested, please contact Lynne Kada, Chapter Council Chair, at lynnekada@yahoo.com.

**Native Plant Educational Program and Nursery in Sonoma**

The Pauline Bond Community Garden in Sonoma is seeking local CNPS members who would like to help create small demonstration gardens and landscapes with native plants, or help out at the small native plant nursery. There are also opportunities to do homeowner outreach and education, and to work with school children in propagating and planting natives. This project is sponsored by the Sonoma Ecology Center. For more information or to volunteer, contact **Molly Anne Meyn** at 695-2164. – **Bob Hass**

**Spring Wildflower Festival –it was so good,we’re doing it again!**

Our **Spring Wildflower Festival** was such a success that we are currently planning for our next festival. The Festival Committee needs your ideas, energy and commitment to make it happen. If you are interested in helping us with publicity or other areas please contact **Reny Parker**, reny@renyswildflowers.com, 894-9100, or **Ruby Herrick**, rdherr@yahoo.com, 887-8542. – **Reny Parker**

**Bay Area CNPS Chapters to Host September State Meeting in 2004**

The Milo Baker, Marin, Napa, and Yerba Buena (San Francisco and northern San Mateo County) Chapters are scheduled to host the **September 2004 Chapter Council and State Board of Directors meeting**. This is an excellent opportunity to attend a state CNPS meeting close to home! Some ideal qualities for a location would be one that is beautiful, functional, comfortable, and reasonably priced, with catering options, for 50-60 people. Tent cabins or camping facilities are a plus. There are numerous ways you can help, and these events are educational as well as fun, with lots of great people and field trips. Best of all, the work is divided among the four chapters, and we have a whole year to plan it! If you might like to help with arrangements, or know of a centrally-located facility to recommend, please contact **Lynn Houser** at 568-3230 or housers@sonic.net. – **Lynn Houser**

---

**Before the October Meeting, when you’re thinking of flowers…**

**Come on out and Key some, at Plant I.D. Hour!**

Arrive at 6:30, an hour before the October 21st General Meeting, and bring specimens of plants you want to identify. Some specimens will be available if you don’t have any but just want to practice. I will bring my dissecting microscope, hand lens, and books, and can help you work through the keys in *The Jepson Manual* and *A Sonoma County Flora*. Keying can be fun, even if you get stuck. For those who know a lot of plants already, there are always grasses, sedges, and composites to keep things challenging—bring in a curiosity or come to help others. Bring your
dinner if you want to, a hand lens and a copy of Jepson or Sonoma Co. Flora if you have them. A copy of each and glossaries will be available. **The plants are what CNPS is about – come get to know them and some fellow chapter members too!** – Lynn Houser

---

**Or, ...**

**Gather for dinner before the General Meeting**

...and the speaker will be with us!!! In preparation for a really well done and timely talk on our creeks, we'll have a chance to meet our speaker at dinner before the meeting - I only hope that Alastair will be allowed to get SOMething to eat, while answering our pre-meeting questions. Come to the co-op dinner at the Kirin Restaurant - 2700 Yulupa Ave., about half a mile south of the Art and Garden Center. Be there at six so we can get our orders in by 6:15 and have time to talk and eat and talk and get our Speaker to the meeting on time. Be sure to phone me at 538-4551 or e-mail at maygmiller@aol.com so we'll have a table big enough. – May Miller
Chapter Field Trip News

Mushrooms – to eat or not to eat?
Chapter members are invited to join SOMA (The Sonoma County Mycological Association for a fun, informative and epicurean foray to Salt Point State Park on Thursday, November 20. Watch for details in November’s newsletter, or contact ML Carle at mlml@svn.net.

Monday Walkers
A group of retired and somewhat retired CNPS members take hikes on Mondays in Sonoma and Marin County. The hikes are generally about two easy miles in length, and involve lunch on the trail. We have our own botanist, Dr. Keith Wagonon, to help us to identify plants we encounter. The group is very congenial, and we welcome all levels of experience. Please call Joyce Bacci, at 869-2143 for details.

– ML Carle

Milo Baker Chapter needs you!
Help protect native plants
Are you interested in becoming more involved in protecting Sonoma Country’s precious native plants and their habitat? They need your advocacy. There are lots of ways to help. If you’re not sure how you want to be involved, whether you’re just at the “checking it out” stage or looking for a committed role, you can start by introducing yourself to any of the Board members at the General Meeting. Or give a call to Ruby Herrick at 887-8542, or email her at rdherr@yahoo.com

Hospitality Help Needed for General Meetings
Who brings the coffee & tea & cookies every month at the General Meeting? Who sets them out invitingly so we can munch and sip as we socialize and peruse the dazzling display of books? Who has set out the name stickers and pens and signup lists, and who has made sure all those cold, hard folding chairs are set up for us to squirm in while we bask in the glow of fabulous slide shows and lectures? A quietly gracious lady whom you may not have noticed, Joan Grosser is the unsung heroine of the General Meetings and she could use a little help. If you could be her assistant (or co- or whatever) Hospitality Chair, she’d be grateful & so would we all. Please contact Joan if you can help, at 781-3854 or JRGrosser@aol.com.

Treasurer Needed for Milo Baker Chapter
Are you a bookkeeper with a few hours to spare each month? Milo Baker could use your talents! The job includes managing the chapters receipts and bills, keeping records of our book/poster/t-shirt inventory, and attending chapter board meetings every other month. The treasurer also helps the chapter prepare an annual budget in January. State duties are only quarterly sales tax transfers and an annual report. This volunteer position will typically only take a few hours of your time each month plus two weekends when we have our big events: the Fall Plant Sale in Oct, and our Spring Wildflower Festival. The chapter currently uses QuickBooks (PC), so knowing this program is a plus, but not necessary, it’s easy to learn. If you are interested, please call or email Nancy Prouty at 874-1294, prouty@sonic.net or Ruby Herrick at 887-8542, rdherr@yahoo.com.

Santa Rosa Creeks – Master Plan Process
Results & Discussion of Citywide Creek Master Plan Workshops, Wednesday, October 29, 6:30 - 8:30 pm. The results of the public involvement process will be presented at a citywide meeting in the Forum Room at the Central Santa Rosa Library, located at 3rd and E Streets. Please join us for a celebration of Santa Rosa’s creeks and a discussion about where to go from here.

Citizens exchanged ideas and concerns about habitat restoration, flood protection, creekside trails, private property, educational opportunities, and water quality at five Citywide Creek Master Plan workshops held in Santa Rosa this past summer. The Plan will address over 70 miles of waterways that flow through Santa Rosa.

Over 250 participants were directly involved in the workshops and several creek walks (equivalent to about 400 volunteer hours), and many, many others in the community provided comments for the Plan through telephone or email. Despite very warm weather and some challenging economic times in Santa Rosa, people came out this summer to participate in the planning for their creeks, volunteering their valuable time to help out. Such interest and support shows how important and special our creeks are as a resource for the community.
Contact Sheri Emerson at (707) 543-4225 or sjemerson@ci.santa-rosa.ca.us for more information. Project partners include the City of Santa Rosa, Sonoma County Water Agency, Sonoma County Agricultural Preservation and Open Space District, and the National Park Service Rivers, Trails, and Conservation Assistance Program. – Sheri Emerson

More community projects in support of native habitat

**It's time to Plant Natives at Santa Rosa’s Doyle Park Native Plant Garden**

Mark your Calendar for Sunday, October 19th at 1:00 pm. This is what we’ve been waiting for! Come get your shovel in the ground and plant some native plants with friends under the big valley oak. Dana Glei and I went plant-shopping for the city last month at Cal Flora Nursery, and now we want to extend a warm invitation to all those in the chapter to come out and plant some natives for the public.

Thanks to the hard work of a few volunteers, this “Adopt-a-Green-Space” has been improved with decomposed granite paths, pruning, weeding, and recent mulching. The Milo Baker Chapter now has a Certificate of Recognition for our yearlong volunteer service with the City Recreation and Parks Department. During our previous work parties we have received many praises on our work on the Garden, and are inspired to make it an educational place with beauty and wildlife potential. We need more volunteers to help maintain the new plants and work with the city to get signs and other improvements. Our work parties are regularly scheduled the third Sunday of the month at 1:00 p.m. Doyle Park is located on Doyle Park Drive (behind the school), reached from Sonoma Ave. between Brookwood and Farmer’s Lane. Refreshments will be served. Bring gloves and tools. For more information, please contact Lynn Houser (568-3230), or Dana Glei (544-3006). – Lynn Houser

LagunaKeepers Work Party

LagunaKeepers, the volunteer corps that helps to maintain the Laguna de Santa Rosa in Sebastopol, are looking for helpers on Saturday, October 18 from 9 am to noon. Meet behind the Youth Annex (building next to the Community Center) and bring tools, gloves, water and a friend. This year CLIF Bar, Inc. is sponsoring the group by offering free CLIF Bars to LagunaKeepers. There will be a second work party on November 15. Email your questions to Mary Abbott at sebastopolvolunteers@yahoo.com. We hope to see you there! – Mary Abbott

Create a Nature Trail in Monte Rio

Monte Rio, located in a beautiful section of the Russian River surrounded by redwood forests, streams and the river, does not have a public facility where people can spend time in the forest to contemplate and appreciate its wonders and beauty, nor does it have any public place dedicated to the observation of a healthy riparian environment.

The members of the Monte Rio Nature Center Study Committee see an opportunity to create a nature/educational center to benefit the community, serving residents and visitors of all ages. The Center would be located on the old Monte Rio elementary school property.

We want to offer a much needed forest/creek walking trail, perhaps linking to other trails, and an opportunity to observe and learn about the interactions of plants and animals in an environment that fosters contemplation and awe. We also want to provide a chance to observe the workings of a wild stream as it meanders through the redwood forest and as it occasionally floods the forest floor.

We propose to develop this nature center using a mix of redevelopment money and other sources of funds. The Monte Rio Recreation and Parks District (MMR&PD) owns the property and would operate the center. This project aligns well with the MMR&PD mission “to provide recreational facilities and activities to residents and visitors year round.” This project could also enhance their joint efforts with the local school district, and will nicely complement the existing active, sports-related recreational facilities offered by the MMR&PD. The property is located in the redwoods on Dutch Bill Creek, a major tributary to the Russian River, just upstream of the confluence with the river at 9725 Main St. near downtown Monte Rio. The Sonoma County Agricultural and Open...
Space District holds a conservation easement on the property. The property is located within the Russian River Redevelopment Area.

We are seeking partners and expertise to make this project a success. Several community leaders have expressed an interest in supporting this project. If you are interested in joining us, please contact Victoria Wikle, phone 865-2474 or email at VictoriaWikle@usa.net. – Victoria Wikle

THE CALIFORNIA NATIVE PLANT SOCIETY is a statewide non-profit organization of amateurs and professionals with a common interest in California’s native plants. The Society, working through its local chapters, seeks to increase understanding of California’s native flora and to preserve this rich resource for future generations. Membership is open to all. Membership includes *Fremontia*, a quarterly journal with articles on all aspects of native plants, the *Bulletin*, a quarterly statewide report of activities, and the Milo Baker Chapter newsletter. WE INVITE YOU TO JOIN US.
